## CAREER SUMMARY

I am an accomplished Java Developer with over four years of experience in developing robust, scalable, and efficient Java applications. Throughout my career, I have demonstrated proficiency in Java programming language along with a strong understanding of software development methodologies and best practices. My expertise extends across various domains including web development, enterprise applications, and database management systems.

## WORK EXPERIENCE

### Sr. Software Developer

Nov 2021 - Feb 2024

- Developed and maintained server-side logic using Java and related technologies to ensure the functionality of web applications.
- Create Restful API and integrate them with front end components to facilitate data exchange between the client and server.
- Experienced in working with micro-services architecture, effectively implementing and maintaining modular and scalable systems.
- Actively participated in client meetings and discuss about the requirement and work progress.
- Worked with both SQL and NoSQL databases, demonstrating versatility in database management systems.
- Conducted unit testing, integration testing, and debugging of backend components to ensure robust and error-free functionality using.
- Used version control systems like Github, GitLab to manage codebase changes and collaborate effectively with other developers.
- Collaborated with frontend developers, UI/UX designers, and cross-functional teams to deliver integrated and cohesive solutions.
- I maintain a proactive approach to professional development, continuously enhancing my skills and staying abreast of industry advancements while actively engaged in development projects.

#### Technologies used:

       
 

### 7Span Internet Private Limited

## SKILLS & TOOLS

### Backend

Java

Java 8, Java 17

Spring Framework

Spring Boot, Spring JPA, Spring AOP

ORM Tools

Hibernate, Spring data JPA

MicroServices

Database

MySQL, Postgres, MongoDB

Build Tools

Maven, Gradle

Version Management

GitHub, BitBucket, GitLab

### Others

     
    

### Software Developer

### Knowledge Consortium Of Gujarat

June 2020 - Nov 2021

- Developed, maintained, and optimized server-side code using Java programming language, adhering to best practices and coding standards to ensure clean, readable, and maintainable code.
- Created and maintained RESTful APIs for seamless communication between frontend and backend systems.
- Identified and resolved software bugs and issues through rigorous debugging and troubleshooting processes.
- Effectively resolved customer queries through phone and in-person interactions, providing prompt and satisfactory solutions.
- Collaborated closely with a diverse and dynamic team, effectively contributing to project success through cooperative effort and collective problem-solving.

#### Technologies used:

     

## EDUCATION

### Master of Science in Information Technology

K S School OF Business Management -

Gujarat University

2018 - 2020

### Bachelors of Science in Information Technology

K S School OF Business Management -

Gujarat University

2015 - 2018

## WORK EXPERIENCE

---

### Web Developer (Intern)

Jan 2020 - Jun 2020

Byte & Bits

- Actively participated in various aspects of web development projects, gaining valuable hands-on experience and practical skills.
- Honed abilities to work effectively in a team environment, communicate ideas and solutions, and adapt to new challenges and technologies through the internship.
- Completed intermediate Laravel training, executing a project using HTML/CSS, jQuery, MySQL, Laravel, and PHP.
- Collaborated closely with senior developers and team members in code reviews, debugging sessions, and troubleshooting efforts.

#### Technologies used:

Laravel    PHP    HTML/CSS    MySQL    jQuery    GitHub
